Reg. No.....  
Signature .....

**DIPLOMA EXAMINATION IN ENGINEERING/TECHNOLOGY/  
MANAGEMENT/COMMERCIAL PRACTICE, APRIL – 2023**

**APPLIED PHYSICS -II**

[Maximum Marks: 75]

[Time: 3 Hours]

**PART-A**

**I. Answer *all* the following questions in one word or one sentence. Each question carries 'one' mark.**

**(9 x 1 = 9 Marks)**

		Module Outcome	Cognitive level
1.	Write one example for simple harmonic motion	M1.01	R
2.	Explain the term reverberation.	M1.04	R
3.	The twinkling of stars is due to.....	M2.01	U
4.	What is the SI unit for power of a lens?	M2.02	R
5.	State Ohm's law.	M3.02	R
6.	To convert a galvanometer into an ammeter, a low resistance is connected in .... with the galvanometer (series/parallel)	M3.04	U
7.	How a diode is connected to a battery in forward bias?	M4.01	R
8.	State whether the following statement is true or false. The band gap of semiconductor is less than that of insulators.	M4.01	U
9.	Give one application of carbon nanotubes.	M4.04	R

**PART-B**

**II. Answer any *eight* questions from the following. Each question carries 'three' marks.**

**(8 x 3 = 24 Marks)**

		Module Outcome	Cognitive level	
1.	Match the following	M1.01	U	
	Column A			Column B
	Displacement of a particle executing simple harmonic motion.			$\frac{2\pi}{\omega}$
	Period of simple harmonic motion			$\frac{1}{T}$
	Frequency of simple harmonic motion	$y=asin\omega t$		
2.	Distinguish between longitudinal and transverse waves.	M1.02	U	
3.	Explain the phenomenon of beats.	M1.02	U	
4.	List any three applications of ultrasonic waves.	M1.03	R	
5.	What do you mean by total internal reflection? What are the conditions for total internal reflection?	M2.04	U	

6.	A wire of length 2 m and radius 0.1 mm has a resistance of $200 \Omega$ . Find the specific resistance of the material of the wire.	M3.02	A
7.	Mention any three characteristics of Nano materials.	M4.04	R
8.	Distinguish between spontaneous emission and stimulated emission.	M4.03	U
9.	How transistor works as an amplifier?	M4.01	R
10.	Describe the formation of P-type and n-type semiconductor.	M4.01	U

**PART-C**

Answer all questions. Each question carries 'seven' marks

**(6 x 7 = 42 Marks)**

		Module Outcome	Cognitive level
III.	What are the characteristics of a wave? Derive the relation between wavelength, frequency and velocity of a wave. <b>OR</b>	M1.02	U
IV.	A tuning fork makes one complete vibration in $1/200$ second. If the velocity of sound in air is 340 m/s, find the wavelength of the sound waves produced by the tuning fork.	M1.02	A
V.	Explain the working of astronomical telescope. Discuss the resolving power of astronomical telescope. <b>OR</b>	M2.03	R
VI.	A converging lens forms a real image. If the image is twice the size of the object and 72 cm from the lens, calculate the focal length and power of the lens.	M2.02	A
VII.	Sketch the ray diagram for the image formation by a convex lens, when the object is placed (i) beyond 2F (ii) between F and 2F. Discuss the nature of the images. <b>OR</b>	M2.01	U
VIII.	Outline the structure of an optical fiber. List any three applications of optical fibers.	M2.04	R
IX.	Discuss the working of meter bridge with a neat diagram. <b>OR</b>	M3.03	U
X.	Write a note on (i) Coulomb's law (ii) Electric field (iii) Electric potential.	M3.01	R

XI.	Explain the construction and working of a moving coil Galvanometer?  <b>OR</b>	M3.04	U
XII.	Two resistances $12 \Omega$ and $6 \Omega$ are connected in parallel and the combination is connected in series with an $8 \Omega$ resistance. Find the effective resistance.	M3.02	A
XIII.	Discuss the working of He-Ne gas laser with a neat diagram.  <b>OR</b>	M4.03	U
XIV.	Explain Einstein's photoelectric equation and the laws of photoelectric effect.	M4.02	U

\*\*\*\*\*
